## Mabinogi reforge guided

I had no idea that you do this rude as well. But at the same time you weaken yourself to receive more DMG of opposite elements monsters and make less DMG for the same monster of elements. I was not sure about +6 ~ 14 where will it be applied - only to point 1 ~ 2 and/or point 3? Your main question was that your DMG will be reduced, the answer is yes, but smaller than the normal element. Oh, does it lead me to another question, your elementary equipment is important at point 4? Yes, they are not normal elementary charming. Therefore, assuming the nois 6 reinforce, then+6/+7/+8/+9/+10/+11/+12/+13/+14. The elementary count of reinforcing as 1 slot, but the effect depends on the noisy and has priority regarding the normal element. Point 2: They can cancel the status of the elementary target not effective. But if it is against ice 8 monster: point 1 ~ 2 boost:  $(13 - 8 - 1) * 11 = 44\%$  increase point 3 boost: uhhh [s] 44% increase or [s] 33% decrease  $\pm$  o? [When using this rule: when the target is not elementary] that means if an enemy is a neutral element, meaning no element. I imagine it is like this: No weapon 6 on fire 1 ~ 9 enemy + 66% / + 77% / + 88% / + 99% / + 110% / + 121% / + 121% / + 121% / + 121% / + 121% and ice weapon 6 on rays 1 ~ 9 enemy + 11% / + 11% / + 22% / + 22% / + 33% / + 33% / + 33% / + 44%. But what about the weapon of the ice 6 on ice 1 ~ 9 enemy? I have to keep your representative as a bot, I think! SOLUNA RANK 1 IMP POSTS: 4891 ENTERED: Wednesday, May 13, 2009, 21:38 Soluna Post  $\hat{A}$  »August 20, 2012 14:32 Yoorah wrote: Increrable Guide, the work. Platinum tropus! Point 4 Boost: Jump from 8 = 8 Total = +88% or [s] +11%? We have 7 leftover slot, but as the enemy is  $\odot$  Ice 7, there is 0% of total effect = [s] (55+55+0) = +110% or [s] (55-22+0) = +33%? I think 8? 88%increase? [When to use this when when you have more elemental than target] With all the previous points and now this final point we can actually calculate the dmg bonus now: Example A - Level 4 Lightning Bow on Ice 9 Enemy Okay so Lightning and Ice rule is increase 11% every 3 Ice target has so we get 33% bonus this is basic elemental rule, we skip Point 1 because target has elemental, skip Point 2 because it is ice and lightning. Point 4 boost: 77% increase? Q2: For Point 3, calculation based on weapon AND equipment or just weapon? 2. 3. Oh yeah, how do you even reach +14 actually if the weapon is 2 handed... Also, say what if you have also 7 other equipment with ice elemental? Share and study Mabinogi knowledge in the form of guides, advice, etc. ... Basically what I'm just worried about is the WORST case - will my damage go down if I have elemental reforge or such. For Lightning, skip Point 1 and 2, i.e. A Level 4 Fire Bow would give you 33% increase on non-elemental monster, A Level 2 Ice and Level 2 Lightning bow will give you 22% increase on non-elemental. Point 4 boost: skip since  $8 < 9$  Total = [s]+66% or [s] +11%? Point 4 boost: uhhh  $8 > 6$  so do it... [When to use this rule: When you have same element as target or when the element you are deal are Fire and Lightning] This means even if you elemental reforge have no effect or WEAK against the target monster you can still cancel it out like point 1 and make them weak against particular element. Point 4 boost: uhhh we do it here since  $8 > 7$ ... Here's what's Elemental reforge is different: 1. We are gonna pass up on Point 4 because we only have 1 slot that is the Level 4 Lightning bow, so we get 66% damage bonus in the end. Ice 6 monster Point 1~2 boost:  $(13 - 6 - 1) * 11 = 66\%$  increase Point 3 boost: uhhh [s]66% increase or [s] 11% decrease? It seems like Point 1~3 only care about reforge level and not your other equipment. For point 3 we get  $(9/3 + (2-1))*11\% = 44\%$  bonus We used 2 slots and enemy has 9 so we skip Point 4 and end up with 77% <sup>3</sup>. Sky o senpai >w< Posts: 1500,Joined: Thu May 20, 2010 5:35 pm IGN(s): Sky Server: Ruairi Post by Sky $\hat{A}$  Mon Nov 19, 2012 7:08 pm What happens in Point 3 if the enemy's the same elemental as your weapon's? I've been reading this quite a number of time already (and even spent my entire class time just in this page alone) and I suppose I'm just having a hard time comprehending it lol. They cost 1 slot of element but provide bonus for more than 1 but when resisted they only penalize you for 1 slot. Gotta keep your rep as a bot, I guess! I did lose my sleep yesterday because of this
